

**AUTHOR KLB** is an anti-theft system designed to protect cars equipped with the standard Keyless Access system. By blocking the standard radio channel digitally via the CAN bus, the system protects your car against theft attempted by intercepting and retransmitting the transponder key signal.

 This manual covers the following device versions:

- AUTHOR KLB
- AUTHOR KLB KIT: 2xKEYFOB
- AUTHOR KLB NL KIT: 2xKEYFOB

---

## Operability check

Once your car is back from an installation center, follow the steps below:

- [Check authorization and the Armed mode.](#)
- [Check activation of the Service mode.](#)
- Ask where exactly the system has been installed in your car.

 If authorization via keyfob is unavailable and the LED turns red when you insert the battery, replace the battery with a new one.

---

## Personal owner card

The complete set includes the personal owner card that contains all essentials regarding the system.

- Bluetooth Pairing Code** a secret code under the protective layer. It helps you pair your smartphone with the system to use it as a keyfob.
- Card Number** an ID number of the personal owner card.
- Device Number** a unique identification number of the system.

✔ For some devices, the codes may be indicated on a sticker on the inside cover of the Quick Start manual.

## Definitions

### Service indication

Service indication notifies you if the car's radio channel blocking is disabled and of any changes in the device's settings. Indication is produced via standard symbols on the dashboard and depends on the car's make, model, and equipment.

### Authorization

This algorithm helps you unblock the car's standard radio channel. Depending on a mode, you get authorized via a keyfob/smartphone paired with the system or by pushing UNLOCK button on the standard key.

## Important information and warnings

- The service indication, the control unit for system configuration, as well as system features depend on the car's brand, model, equipment, and year of manufacture. For more details, see the Appendix, contact your installation center, or AUTHOR-ALARM's Technical Support.
- The manufacturer reserves the right, without any prior notice to the user, to introduce changes to the product design to improve its operation and technical specifications.
- These features may vary depending on the car's brand, model, equipment, and year of manufacture. For more details, contact [official dealerships](#), certified installation centers, or AUTHOR-ALARM's Technical Support.
- It is not recommended to scratch the protective layer of the secret code unless really needed.
- It is not recommended to keep authorization keyfobs together with a standard key or keyfob.
- Do not keep the keyfob inside the car once your trip is over — otherwise, anti-theft features will be disabled.
